

UNIC LIFELONG LEARNING

WORKSHOP SERIES

WORKSHOP 7: Towards an individualized curricula based on micro-credentials: The approach of ULiège

The growing distance between the labour market and the academy calls for new teaching and lifelong learning approaches. In this context, developing micro-credentials is a way to offer flexibility and diversification to future learners, employers and universities.

During this workshop, the lifelong learning team in ULiège will present their approach(s) on developing micro-credentials as tools for allowing integrated and specific learning trajectories and their response to companies' and organizations' demands. ULiège strives to be responsive to individuals and foreign student's future needs. We propose to debate the various learning trajectories that micro-credentials allow and identify the drivers and obstacles that may be met across our UNIC universities. This 7th workshop in the UNIC Lifelong Learning Series aims to present a diversity of approaches and aims to compliment discussions on the UCC experience

Chair: Sylvain Marbehan, ULiège, University of Liège.

Contributors:

Boutheina Ben Lamine is an international expert in human resources management and is responsible for lifelong learning at the University of Liège.

Charlotte Delaresse is a project manager for lifelong learning at University of Liège

Sylvain Marbehan is responsible for interuniversity mobility and teaching actions for the UNIC European University of Post-Industrial Cities.
